Local NPTEL Video Server

NPTEL (National Programme on Technology Enhanced Learning) is a project initiated by the Indian government to provide quality educational content in the form of video lectures and course materials in engineering, science, and humanities. NPTEL courses are designed to enhance the learning experience of students and educators across India.

An NPTEL Local Server, also known as an NPTEL SWAYAM Local Chapter Server, is a system that allows educational institutions to host NPTEL course content on their own local servers. This setup is particularly useful in places with limited or unreliable internet connectivity. By hosting the content locally, students and faculty members can access the NPTEL courses without needing a continuous internet connection.
