Respected Sir/Madam,  
Dr Abhijeet Joshi  
Atmiya University, Rajkot

Congratulations!

Your proposal with ID DBT/CTEP/01/20230955633 has been approved by DBT. You have been granted financial assistance of Rs. 150000. Financial assistance would be released as per DBT-CTEP norms.

**Below is the committee's remarks:**

Recommended for Rs. 1,50,000/-

The grant would be released on submission of the following requisite documents at the earliest, subject to availability of funds:

1. Utilisation Certificate and Statement of Expenditure (UC and SE) as per the format available at CTEP Conference guidelines. The UC&SE should be duly signed and stamped by an independent Chartered Accountant in case the organisation is Non-Government.
2. A detailed report and photographs (soft copy) of the event along with the copy of publication(s)/proceedings clearly mentioning the number of participants (National & International).
3. Duly verified Bank details of your organisation (Name as per bank account, Bank Name, Branch and Address, Account No, Nature of account, IFSC code and MICR Code).

Note: Claims should be submitted within 3 months of the successful completion of the event. Any claim received beyond this period will not be considered for payment.

The recommendation is also available on our [website](#).

Dear Mr. Joshi,

Thank you for submitting your review of "Integrative Analysis of Microbiome and Metabolome Revealed the Effect of Microbial Fertilizer on Microbial Community Diversity and Function in Rhizospheric Soil Under Tobacco Monoculture" (control no. Spectrum04046-23). A copy of the review is attached for your reference.

(Please note that any attachments you may have included with the review will not be shown in this e-mail.)

**Open Peer Review**

ASM policy allows authors who submit to Microbiology Spectrum to opt for open review. If the author opts for open review and the paper is accepted and published by this ASM journal, then the review(s), decision letter(s), and author response(s) will also be published. As a reviewer, you may optionally choose to disclose your identity and allow your name to appear in published materials. At the time this version of the manuscript was submitted, the open review status was as follows: author opted out.

**Comments for the Author:**

In material and methods:  
Tobacco plant growth and sampling  
Need more clarification on traditional compound fertilizer to confirm the impact  
Metabolome Analysis of tobacco rhizospheric soil  
Need more clarification on extraction of metabolites and on LCMS parameters.  
In discussion section:  
560, Prediction of biomarker(parameters) are missing

**Comments to the Editors (Required):**

As traditional compound fertilizers information is not mentioned in manuscript it is difficult to predict the impact of microbial communities and metabolites  
IN LCMS analysis missing data is its flow rate, solvents used.

Dear Dr. Ranpara,

I am writing to you as to an expert in the topic related to the paper listed below. Let me ask if you would like to be a referee for the manuscript entitled "Comparing the Influence of Cyber Security Knowledge on Attack Detection: Insights from Experts and Novice Cyber Security Professionals" by Prof. Mozam M. Saeed (corresponding author) and could help us in determining whether this manuscript is appropriate for publication in Open Computer Science (<https://www.degruyter.com/journal/key/comp/html>)

**Please DO NOT respond to this email directly, use the links below.**

This is the abstract:

Cyber security relies on knowledge of the domain and stipulates reasoning and cognition to assess threats in network data. Non-compliance with data-breach prevention procedures by employees poses risks to cyber-attacks. This study contributes by raising awareness of information security among experts and novices. The impact of cyber security knowledge on detecting intrusions in simple networks is examined. A simplified Intrusion Detection System (IDS) is developed to investigate the uncovering of malicious events by individuals with or without cyber security knowledge. A cross-sectional study was conducted by recruiting 75 respondents who were from Al Neelain University. Among these participants, 35 were considered novices (students) in cyber security; while 40 were security professionals from technical communities. The study procedure involved novices observing ten scenarios and completing the questionnaire, while experts observed three scenarios and filled out the questionnaire. The findings of this study demonstrate that cyber security knowledge facilitates the accurate detection of malicious events and reduces mislabelling benign events as malicious. A deep understanding of a particular network is necessary for making precise detection decisions, which rely on cyber security knowledge. Experts exhibit the capability to differentiate different types of cyber-attacks. They accurately assess various network settings and determine the maliciousness of networking events with greater precision. In conclusion, this study highlights the importance of cyber security knowledge in detecting and differentiating cyber-attacks. The expertise of experts in network analysis and precise determination of malicious events emphasizes their significance. These findings have practical implications for enhancing attack detection capabilities.

**Your 2023-2024 Teaching Excellence Award Reviews**

CSTA Awards Committee <awards@csteachers.org>  
To: Ripal Ranpara <ranpararipal@gmail.com>

Tue, Apr 2, 2024 at 12:58 AM

Dear Ripal,

Greetings!

You are being requested to review applications for the 2023-2023 CS Teaching Excellence Award as a reviewer.

The deadline for submitting reviews is **Sunday, April 23, 2023, at 11:59 p.m. PT.**

To view the submissions and complete your reviews, please use the link below:  
[2023-2023 CS Teaching Excellence Awards: Application Part Two](#)

If you weren't able to join the CSTA Awards Committee for one of the reviewer training sessions, please review the following materials prior to starting your reviews:

- [CS Teaching Excellence Award Reviewer Orientation](#) - this document has everything you need to know about how to log into the review portal and conduct reviews.
- [Cvent application and review portal](#)
- [Zoom recording](#)

If you are assigned someone you know, please let us know so we can reassign that nominee. We want to keep this process from any positive or negative bias reviewers may have regarding a specific nominee. We expect that the review of each nominee should take about 30 minutes to an hour to review.

**Deadline:**

We ask that all reviews be completed by **Sunday, April 23, 2023, at 11:59 p.m. PT.**

To login to the reviewer portal, follow these steps:

1. Go to the CS Teaching Excellence Award Landing Page.
2. Click "Log In" in the upper right-hand corner of the webpage.
3. A login screen will pop up. Under the "log in" button, please click "Need to create an account?"
  - Note: you do need a new account for this specific project, even if you have previously applied or reviewed submissions in Cvent.
4. Create an account using the email address we are using to contact you.
  - If you have already created your account for this project, please skip this step.

Dear Honorable Reviewers,

Good Day to you.

Thank you for signing up as a reviewer for 2024 IEEE 15th Control & System Graduate Research Colloquium (ICSGRC 2024).

To provide authors with timely decisions, we kindly ask for your support in completing your reviews by 15th April 2024.

For those who have not yet started or do not recall the instructions, please click on the following link:  
[https://www.asprg.net/icsgrc2024\\_co/review/signin.php](https://www.asprg.net/icsgrc2024_co/review/signin.php)

Sign in using the username and password you created when you signed up as a committee member. If you have forgotten your username or password, the website provides options to reset them.

After logging in, the website will display the list of submissions assigned for you to review. Clicking on the submission title will bring up the online review form, and clicking on the file symbol to the right of the submission title will bring up a copy of the file.

You may also reopen, modify, or amend previously submitted reviews before the review deadline.

Please note that the Technical Committee has already checked all submitted articles using IEEE Crosscheck to ensure that the similarity index (SI) is not more than 30%. Hence, any paper with an SI above 30% will be rejected and will not be designated for review. Therefore, reviewers are NOT REQUIRED to perform any plagiarism checks using TURNITIN or similar software.

Also, each paper is assigned to five reviewers. Once we have received a sufficient number of reviewers to make a decision, we will release the remaining reviewers who have not completed their tasks, even before the deadline for reviews.

REMINDER: By reviewing unpublished submissions, you are accepting the ethical responsibility not to disclose their contents to anyone else.

If we assigned you your own submission or a submission for which you have a conflict of interest, let us know and we will reassign you!

As a token of appreciation, we will issue an e-letter of appreciation to reviewers who have completed their review tasks.

Thank you for supporting the success of the 2024 IEEE 15th Control & System Graduate Research Colloquium (ICSGRC 2024).

Best Regards

Supporting Your Editorial Experience

Dear Mr. TANK,

Thank you for your application to join the International Journal of Computer-Assisted Language Learning and Teaching (IJCALLT) as a reviewer. The Editor-in-Chief has determined that your expertise is a good fit for this journal and has added you to the journal's list of ad hoc reviewers. Once a manuscript is received that aligns with your research expertise, it will be sent to you for review. We strongly advise that you consult the [peer review section](#) of the IGI Global publishing page. Authors of articles submitted to this journal are relying on your valuable feedback. It is important to provide the most detailed assessment possible. Please see a quality peer review sample [here](#). Upon the completion of 2-3 quality and timely reviews, ad hoc reviewers have the potential to be promoted to full editorial review board member status.

If you have any questions, please contact the journal's Editor-in-Chief at [ijcallt@igi-global.com](mailto:ijcallt@igi-global.com).

Thanks, and have a nice day!

Subject: - Invitation to work as a Referee for Ph.D. Thesis submitted  
by Mr. RAM PANKAJBHAI MULUBHAI

Dear Sir/Madam,

As required under Ph.D. rules of this University, the Vice-Chancellor has been pleased to invite you to kindly work as one of the Referees to examine the Thesis submitted by Mr. RAM PANKAJBHAI MULUBHAI for the degree of Ph.D. in the subject of Chemistry under the Faculty of Science and to make recommendation whether the thesis is worthwhile for awarding Ph.D. Degree or not.

The Title of the thesis is as under:

"CORRELATION OF PHYTOCHEMICALS PRESENT IN LEAVES OF MANGIFERA INDICA L. AND ITS IMPACT ON FRUIT YIELD FROM SELECTED AREAS OF KACHCHH AND SAURASHTRA REGION

I am to add for your kind information that you will be paid as honorarium of Rs.1, 500/- for examining the Thesis.

I shall be grateful if you will kindly accept this invitation. For your convenience, I send herewith a blank form of letter of acceptance which may kindly be returned to this office duly filled in and signed by return of post. An early reply will highly be appreciated.

Thanking You.

Yours faithfully,

"Isolation, Characterization and Cumulative Quantification approach for Nine Organic Impurities in Empagliflozin and Linagliptin Drugs (Article Id: IJCT#112)"

Aim of the study was to identify impurities from linagliptin and empagliflozin. By using  $^1\text{H}$  NMR,  $^{13}\text{C}$ , LC-MS, preparative, and analytical HPLC, impurities were identified. To identify and quantify contaminants, a novel HPLC method has been validated. A gradient programme was used to separate four linagliptin impurities and five empagliflozin impurities, process-related and degradation impurities that which were produced under stress, on the ACE PFP C18 column. Mobile phase A was acetonitrile and 0.1% orthophosphoric acid. As the mobile phase B, methanol and acetonitrile were combined in a 10:90 volume ratio. Pump flow was adjusted to 1.0 mL/min and 230nm wavelength was chosen at 40°C column oven temperature. During stress conditions, acid, humid, base, ultraviolet light, thermal, and oxidative were carried out. The separation was achieved between the peaks and degradation products. method was validated with respect to current ICH guidelines for solution stability, specificity, linearity, ruggedness, precision, accuracy, and robustness. Preparative HPLC was used to isolate two unknown impurities, which were then identified using LC-MS,  $^1\text{H}$  NMR, and  $^{13}\text{C}$ . Based on literature, The first research study to propose nine impurities in mixed dosage forms of linagliptin and empagliflozin with quantifying method.
